Addendum: Drosiprenone (*Slynd*) – A New Progestin-Only Oral Contraceptive

In our article on *Slynd* (Med Lett Drugs Ther 2020; 62:18), the drosiprenone-only oral contraceptive, we mentioned that drosiprenone has antiandrogenic activity that could improve acne and antimineralocorticoid activity that could cause hyperkalemia. We should have added that concurrent use of drosiprenone with other drugs that increase potassium levels, such as the anti-androgen aldosterone receptor antagonist spironolactone (*Aldactone*, and generics), which is often used off-label for treatment of acne, can increase the risk of hyperkalemia.
